Patrick Swanson

Verso - AI consulting lab

Patrick Swanson is an Austrian-American digital journalist and technologist with over a decade of experience in news leadership. As co-founder of Verso, a San Francisco-based consulting lab, he helps newsrooms, business leaders, and non-profits navigate the AI age. Verso offers custom workshops, tools, and AI strategies for media organizations.

Previously, Patrick was a 2024 John S. Knight Journalism Fellow at Stanford University, where he studied the impact of AI on media and democracy. At Stanford, he collaborated with computer scientists to prototype AI tools for journalists and developed training and implementation strategies for newsrooms. His work encompassed AI policy, ethics, coding, and business development.

From 2013 to 2023, Patrick founded and led the social media team at Austria's largest newsroom, managing news coverage for 2.4 million followers across TikTok, Instagram, and Facebook. He pioneered strategies against misinformation and hate speech, and began exploring AI tools for newsrooms as early as 2017. His work in digital journalism earned him Austria's prestigious Walther Rode Prize in 2019.

Misch Strotz

Letz AI

Misch Strotz is a Luxembourgish Engineer and Entrepreneur with a specialization in new media technologies. His keen interest lies in exploring their societal implications. Following his academic journey in ‘Digital Media and Games’ at Hochschule Trier, he finished his Bachelor studies and embarked on his first entrepreneurial venture by co-founding ‘L-Pod’ at the age of 23. The company marked one of Luxembourg’s pioneering podcast and first social media agencies, with Misch serving as the Chief Technology Officer.

Over the subsequent years, Misch has been at the forefront of developing multiple web applications and social platforms. His entrepreneurial spirit led to the inception of his second company, ‘Depixit’, in 2016. Originally, Depixit was launched as a web application developed by Misch. It has since evolved to oversee most of his online enterprises, including his local media agency “Neon Internet,” the award-winning online marketing toolkit “Neontools,” and his latest venture, the generative AI platform, LetzAI.

In his capacities as CEO of Depixit and Neon Internet, Misch played a pivotal role in orchestrating some of Luxembourg’s biggest communication campaigns, notably the National Covid-19 Crisis communication in 2020.

@Lëtz AI

His most recent project, LetzAI, is his commitment to leveraging AI technology, which he believes will revolutionize the markcom industry. LetzAI is an opt-in AI platform to which users can add themselves, their products, and their style to generate images of anything they know. Misch's involvement goes beyond his executive role, as he is also the principal developer behind the LetzAI Tech Stack.

Apart from his professional endeavors with Depixit, Misch is passionate about sharing his insights on technology through social media. He has notably contributed to the discourse on AI and “Synthography” (AI-assisted Media Creation) through a TEDx talk in March 2023, and is actively sharing his work on Twitter.
